## Durlon® Sealing Solutions

As a global leader in high-performance sealing solutions for pharmaceutical and bio-processing applications, we are proud to develop innovative materials and designs that address the challenges unique to this industry. We have developed an extensive range of high-quality, clean and traceable products that are FDA compliant, ABS-PDA and USP Class VI Certified.

### Product Recommendations

**Durlon® 9000** is for use in process piping and equipment in chemical, pulp & paper, food & beverage and other general industrial applications where resistance to highly aggressive chemicals is required.

**Durlon® 9000N** is for use in process piping and equipment in chemical, pulp & paper, food & beverage and other general industrial applications where resistance to highly aggressive chemicals is required. In addition, the shape of the fillers do not allow wicking which can cause corrosion on flange surfaces.

**Durlon® 9600** is an expanded PTFE gasket, made with only pure PTFE resins, designed for use in process piping and equipment, in chemical, pulp and paper, food and beverage and other general industrial applications where resistance to highly aggressive chemicals is required.

**Durlon® Joint Sealant** is a highly fibrillated expanded PTFE form-in-place sealant for gasketed joints and conforms to FDA requirements. Supplied on spools, Durlon® Joint Sealant comes in various thicknesses with a high quality adhesive backing to ease in installation, making it ideal for worn flanges of all sizes and is not dependent on flange dimensions. It exhibits flexibility, compressibility and stability under high temperature and high tensile strength.
